Jefferson Land Trust is a private, non-profit organization that works to conserve land in Jefferson County on the beautiful Olympic Peninsula in western Washington

SOME EXAMPLES OF OUR MISSION AT WORK:

Working Lands

Bulis Forest Preserve, Old Fort Townsend Road

This mature, 135-acre forest was donated to JLT in 1996. It is adjacent to Old Fort Townsend State Park and has a sustainably-harvested forest.

Compass Rose Farm, Discovery Bay

A conservation easement on 42 acres along Snow Creek protects farmland and a buffer for salmon. Protected since 2007.

Red Dog Farm, Chimacum

JLT holds a conservation easement on this 23-acre farm, protecting prime agricultural soils and 910 bank feet of salmon-bearing Chimacum Creek.

Habitat

Quimper Wildlife Corridor, North Quimper Peninsula

180+ platted lots combine to form a ribbon of green that connects five key wetlands in this urban wildlife corridor. Lands have been actively acquired from 1989 to present.

Chimacum Creek, Irondale

155 acres protected by JLT and our conservation partners form the jewel of protection that is the lower mainstem of this creek. The return of salmon, once extinct, to their ancient spawning grounds testifies to the success of this project.

Open Space

Open space has been a part of every project we've ever undertaken, and it particularly applies to those properties we protect that exist among higher density populations, such as the green spaces next to the Haller Fountain and Holly Manor, Port Townsend.

SUCCESS Through Partnerships

Working with the Jefferson LandWorks Collaborative, Chumsortium, North Olympic Salmon Coalition and Snow-Salmon Creek Technical Advisory Group, Jefferson Land Trust has proven its ability to bring together community partners to accomplish more than any organization could have done alone. Working with partners is central to the community-based nature of JLT and the strength of the conservation efforts we undertake.
