Two-thirds of Americans give priority to developing alternative energy over fossil fuels

BY BRIAN KENNEDY ([HTTP://WWW.PEWRESEARCH.ORG/AUTHOR/BKENNEDY/](http://www.pewresearch.org/author/bkennedy/))

Most in U.S. give priority to developing alternative energy over fossil fuels

% of U.S. adults who say ___ should be the more important priority for addressing America's energy supply

Note: Both/Don't know responses not shown.

Source: Survey conducted Jan. 4-9, 2017.

PEW RESEARCH CENTER

(http://www.pewresearch.org/fact-tank/2017/01/23/two-thirds-of-americans-give-priority-to-developing-alternative-energy-over-fossil-fuels/ft_17-01-20_energypriorities_alternative/) President Donald Trump is promising major changes (<http://www.pbs.org/newshour/updates/trumps-cabinet-change-face-u-s-energy-policy/>) on climate and energy policy, including efforts to increase production from fossil fuel energy sources such as coal. But a new Pew Research Center survey finds that 65% of Americans give priority to developing alternative energy sources, compared with 27% who would emphasize expanded production of fossil fuel sources.

Support for concentrating on alternative energy is up slightly since December 2014. At that time, 60% said developing alternative energy sources was the more important priority.

There continue to be wide political differences on energy priorities. While a 2016 Pew Research Center survey (<http://www.pewinternet.org/2016/10/04/public-opinion-on-renewables-and-other-energy-sources/>) found large majorities of Democrats and Republicans supported expanding both wind and solar energy, the new survey shows that Democrats remain far more likely than Republicans to stress that developing alternative energy should take priority over developing fossil fuel sources.

Large divide between Republicans and Democrats over energy priorities

% of U.S. adults who say alternative sources should be the more important priority for addressing America's energy supply

Note: Other responses not shown.

PEW RESEARCH CENTER

Report: The politics of climate change in the United States (<http://www.pewinternet.org/2016/10/04/the-politics-of-climate/>)

About eight-in-ten (81%) Democrats and independents who lean to the Democratic Party favor developing alternative sources instead of expanding production from fossil fuel sources. Republicans and Republican-leaning independents are closely divided: 45% say the more important priority should be developing alternative sources, while 44% say expanding production of oil, coal and natural gas should be given more priority.

Conservative Republicans prioritize expansion of fossil fuels

% of U.S. adults who say ___ should be the more important priority for addressing America's energy supply

Notes: Both/Don't know responses not shown.
 Republicans and Democrats include independents and others who "lean" toward the parties.

PEW RESEARCH CENTER

(http://www.pewresearch.org/fact-tank/2017/01/23/two-thirds-of-americans-give-priority-to-developing-alternative-energy-over-fossil-fuels/ft_17-01-20_energypriorities_consrep/) There is an ideological divide in these views within the GOP. Among moderate and liberal Republicans and Republican leaners — who account for 36% of all Republicans and Republican leaners sampled — 65% prioritize developing alternative energy sources, compared with fewer (28%) who prioritize expanding production from fossil fuel sources. By contrast, conservative Republicans back the expansion of fossil fuels over developing alternative energy sources by a margin of 54% to 33%. Large majorities of both liberal Democrats (88%) and conservative and moderate Democrats (77%) prioritize alternative sources.

Political differences over energy priorities are broadly in keeping with polarized views on a wide range of climate and energy issues. For example, Pew Research Center has found that 88% of liberal Democrats and Democratic leaners say climate change is a major threat to the well-being of the United States (<http://www.people-press.org/2017/01/12/the-world-facing-trump-public-sees-isis-cyberattacks-north-korea-as-top-threats/>), compared with just 12% of conservative Republicans and Republican leaners.

Fact Tank: Most Americans favor stricter environmental laws and regulations (<http://www.pewresearch.org/fact-tank/2016/12/14/most-americans-favor-stricter-environmental-laws-and-regulations/>)
